

Programme : Diploma in Computer Engineering/Information Technology
Programme Code : 06 / 07
Name of Course : Software Engineering
Course Code : CM483

Teaching Scheme:

| | Hours /Week | Total Hours |
|------------------|-------------|-------------|
| Theory | 03 | 48 |
| Practical | 02 | 32 |

Evaluation Scheme:

| | Progressive Assessment | Semester End Examination | | | |
|----------|---------------------------------------|--------------------------|-----------|-----------|-----------|
| | | Theory | Practical | Oral | Term work |
| Duration | Three class tests, each of 60 minutes | 3Hrs. | -- | -- | -- |
| Marks | 20 | 80 | -- | 25 | 25 |

Course Rationale:

Software has become the key element in the evolution of Computer-based systems and products. Over the past 50 years, software has evolved from a specialized problem solving and information analysis tool to an industry in itself. Software is composed of programs, data and documents. Each of these items comprises a configuration that is created as part of the software engineering process. The intent of software engineering is to provide a framework for building software with higher quality.

Course Objectives:

After studying this course, the student will be able to

- Become familiar with the standard Software Engineering Practices.
- Know Project management concepts Planning ,estimation ,Scheduling and tracking
- Apply design concepts and to build design
- Software Quality assurance
- Apply project management and analysis principles to S/W project development.
- Apply design & testing principles to S/W project development.

Course Content:

| Chapter No. | Name of Topic/Sub topic | | Hrs | Weightage |
|-------------|-------------------------------|---|-----|-----------|
| SECTION- I | | | | |
| 1 | Software Engineering Concepts | | | |
| | 1.1 | The Evolving Role of Software | 06 | 12 |
| | 1.2 | Software Characteristics and Application | | |
| | 1.3 | Framework of Umbrella Activities | | |
| | 1.4 | The Process: Software Engineering: A Layered Technology - Process, Methods, and Tools | | |
| | 1.5 | A Generic View of Software Engineering, The Software Process | | |

| | | | | |
|-------------|--------------------------------|--|----|----|
| | 1.6 | Software process model: Prototyping model , RAD Model, Evolutionary Software Process Models, Incremental model , Spiral model, WINWIN spiral model, Concurrent development model ,Component-based development model, Formal methods model, Fourth generation techniques .Component based Development(CBD),Aspect-Oriented Software Development,Agile Process Model: Extreme Programming, Adaptive Software Development(ASD), | | |
| 2 | Requirement Engineering&Design | | | |
| | 2.1 | Requirement Engineering Tasks: Inception, Elicitation, Elaboration, Negotiation, Specification, Validation | 10 | 12 |
| | 2.2 | Initiating the Requirement Engineering Process: Stakeholders, Recognizing Multipoint Viewpoint, Working towards Collaboration | | |
| | 2.3 | Eliciting Requirements: Collaborative Requirements Gathering, Quality Function Deployment ,User Scenarios ,Elicitation Work Products | | |
| | 2.4 | Developing Use-Cases, Building the Analysis model, Negotiating Requirement, Validating Requirement | | |
| | 2.5 | Design Concepts The Design models: Data Design Elements, Architectural-Design elements, Interface Design Elements | | |
| | 2.6 | Component-Level design elements, Deployment-Level Design Elements | | |
| 3 | Software Project Management | | | |
| | 3.1 | The Management Spectrum:4 P's and Significance | 08 | 16 |
| | 3.2 | The People: The Stakeholders ,Team Leader, Software Team, Agile Team ,Communication issues | | |
| | 3.3 | The Process: Software Scope ,Problem Decomposition ,Decomposition Techniques: LOC and FP estimation, Effort estimation | | |
| | 3.4 | Empirical Estimation Models: COCOMO, Putnam estimation model,Function-point models, Automated Estimation Tools. | | |
| | 3.5 | Risk Analysis and Management: Risk identification, Risk projection, Risk assessment, Risk management and monitoring, Risk Refinement and Mitigation, RMMM Plan | | |
| SECTION- II | | | | |
| 4 | Project Scheduling | | | |
| | 4.1 | Basic concepts,-Basic principles :The relationship between people and effort , | 06 | 08 |
| | 4.2 | An empirical relationship:-Effort distribution ,Defining a task set Examples | | |
| | 4.3 | Selecting the task set :Selecting software engineering tasks | | |
| | 4.4 | Defining a task network ,Tracking the schedule -Earned value analysis-Error tracking, Tracking Progress for an OO Project | | |

| | | | | |
|-------|---|--|----|----|
| 5 | Software Quality Assurance | | | |
| | 5.1 | Quality concepts ,The quality movement, Software quality assurance ,SQA activities, Software reviews | 08 | 16 |
| | 5.2 | Defect amplification and removal: Formal technical reviews, The review meeting,Review reporting and record keeping | | |
| | 5.3 | Software reliability: Measures of reliability and availability | | |
| | 5.4 | The ISO approach to quality assurance system: The ISO 9001 standard ,Six Sigma for Software Engineering,The SQA plan | | |
| | 5.5 | Functional modeling and information flow: Data Flow diagrams, UML Modeling :Use-Case ,Class Diagrams ,Sequence Diagrams | | |
| 6 | Software Testing Techniques and Maintenance | | | |
| | 6.1 | Software testing Fundamentals ,Testing objectives ,Testing principles ,Testability | 10 | 16 |
| | 6.2 | White box testing :Basis path testing , Flow graph notation, Cyclomatic complexity , Graph matrices , Control structure testing, Condition testing , Data flow testing, Loop testing | | |
| | 6.3 | Black box testing : Graph based testing methods . | | |
| | 6.4 | Testing documentation , Testing for real time systems. | | |
| | 6.5 | Software Maintenance: A definition of software maintenance, Maintenance Characteristics, Maintainability, Maintenance tasks, Maintenance side effects, Software Configuration Management | | |
| | | Reverse engineering and Re-engineering. | | |
| Total | | | 48 | 80 |

List of Experiments/Assignments:

| Sr. No. | Name of Experiment/Assignment | Hrs |
|----------------|--|------------|
| 1 | Application and use of studied process models such as Agile, CBD,AOSD. | 2 |
| 2 | Define the project title with bounded Scope of Your Project. | 2 |
| 3 | Design Project Plan and SQA Plan | 2 |
| 4 | To Develop Software Requirement Specification using Use-Case Scenario | 4 |
| 5 | To perform data design using design concepts eg. DFD | 2 |
| 6 | To Draw the Activity Diagram to represent a flow from one activity to another activity and draw ER diagram. | 4 |
| 7 | To Draw class diagram, Sequence diagram, Collaboration diagram, State Transition Diagram for assigned project (eg. Library Management) | 6 |
| 8 | To determine Size using Function-Point metric and Cost Estimation using COCOMO model | 6 |
| 9 | To Test software by developing various test cases for software project and practice it on the project | 4 |
| Total | | 32 |

Instructional Strategy:

| Sr. No. | Topic | Instructional Strategy |
|---------|---|--------------------------|
| 1 | Software and Software Engineering | Explanation & case study |
| 2 | Project management concepts | Explanation & case study |
| 3 | Project Management estimation and planning | Explanation & case study |
| 4 | Project Scheduling and tracking | Explanation & case study |
| 5 | Software Quality assurance | Explanation & case study |
| 6 | Software Testing Techniques and Maintenance | Explanation & case study |

Text Books:

| Sr. No | Author | Title | Publication |
|--------|-------------------|--|---------------|
| 1 | Roger S. Pressman | Software Engineering 6 th Edition | Mc. Graw Hill |

Reference Books:

| Sr. No | Author | Title | Publication |
|--------|----------------|-------------------------------|---------------|
| 1 | Jawadekar | Software Engineering | Wiley India |
| 2 | Richard Fairly | Software Engineering Concepts | Mc. Graw Hill |

Learning Resources:Black Board, LCD Projector, Transparencies

Specification Table:

| Sr. No. | Topic | Cognitive Levels | | | Total |
|--------------|---|------------------|---------------|-------------|-----------|
| | | Knowledge | Comprehension | Application | |
| 1 | Software Engineering Concepts | 03 | 03 | 04 | 10 |
| 2 | Project management concepts | 05 | 05 | 00 | 10 |
| 3 | Software Project Planning | 05 | 06 | 00 | 11 |
| 4 | Project Scheduling and tracking | 04 | 04 | 05 | 13 |
| 5 | Software Quality assurance | 11 | 06 | 06 | 23 |
| 6 | Software Testing Techniques and Maintenance | 06 | 03 | 04 | 13 |
| Total | | 34 | 27 | 19 | 80 |
